

Project Report on

Garage Management System

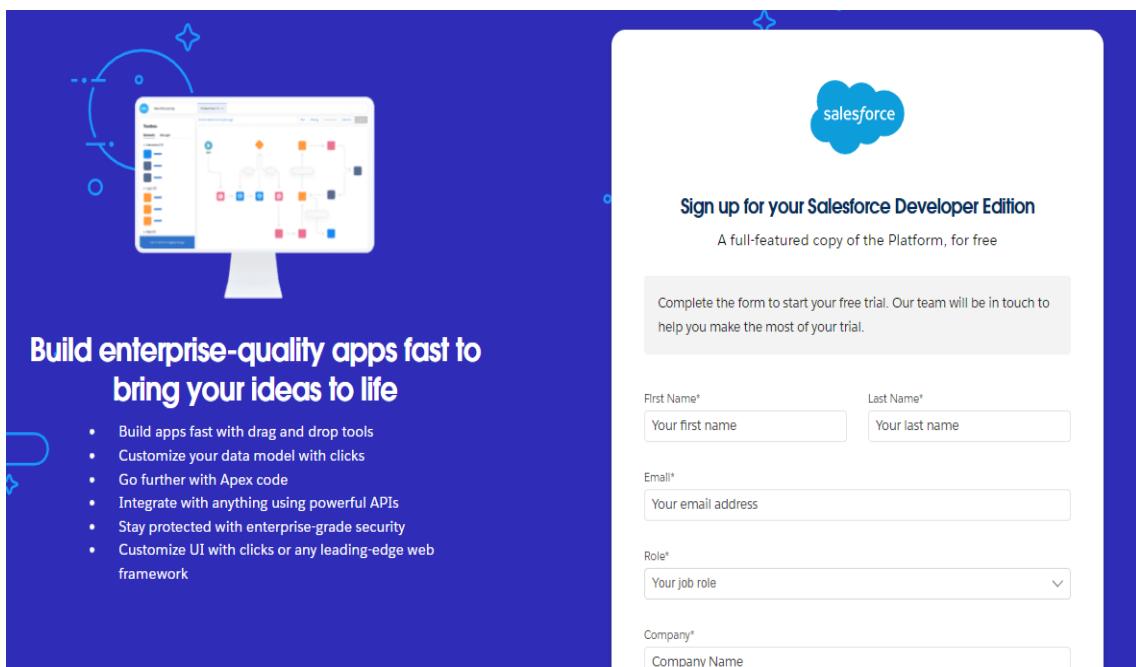

Milestone-01: Create Salesforce Org

Go to developers.salesforce.com/Signup

Click on sign up.

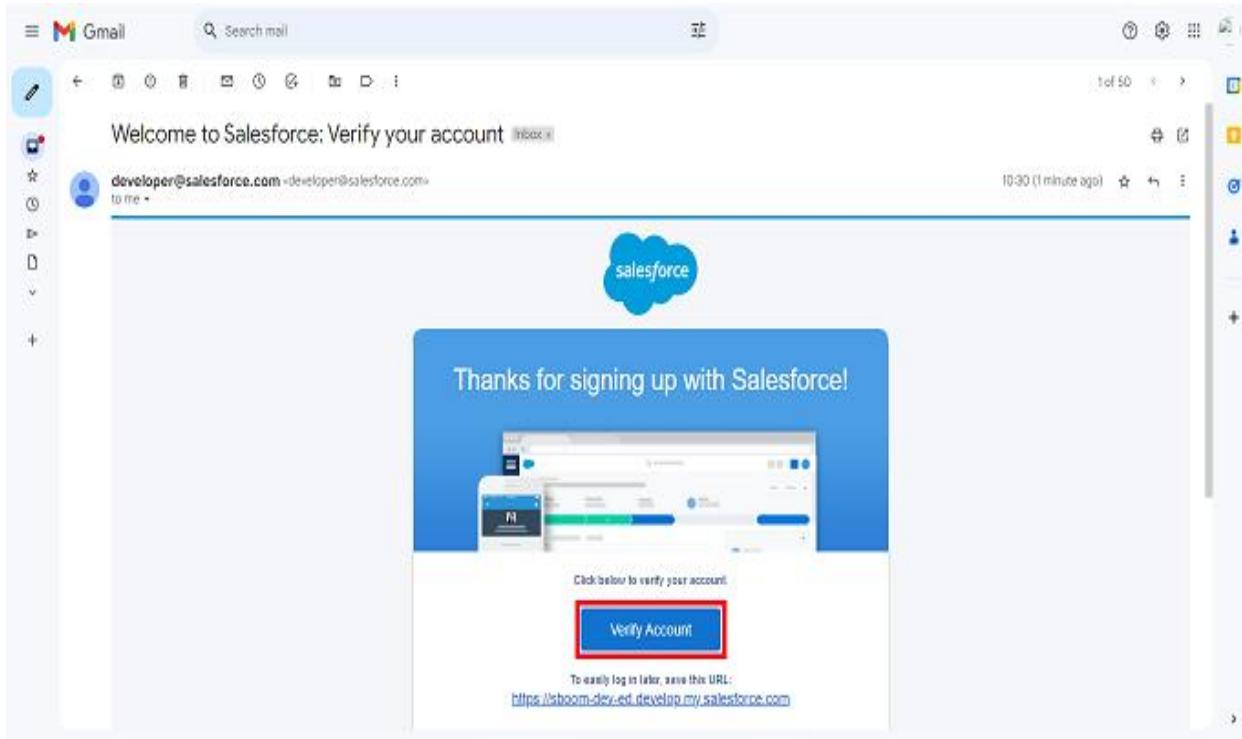

On the sign-up form, enter the following details:

1. First name & Last name – G.M.CHANDANA
2. Email – gollamarrichandana@gmail.com
3. Role: Admin
4. Company: GAYATRI DEGREE COLLEGE – TIRUPATI
5. Country: India
6. Postal code: 517501
7. Username: chandana@gdcproject.com

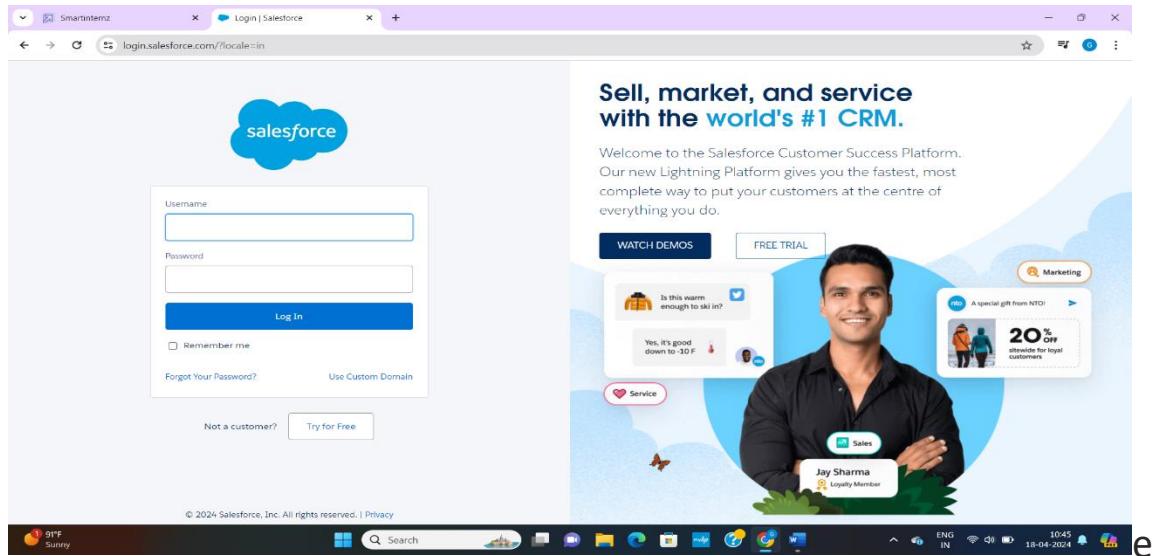

Account Activation:

GO to the inbox of the email that you used while signing up. Click on the verify account to activate your account. The email may take 5-10mins.

Login to Your Salesforce Account:

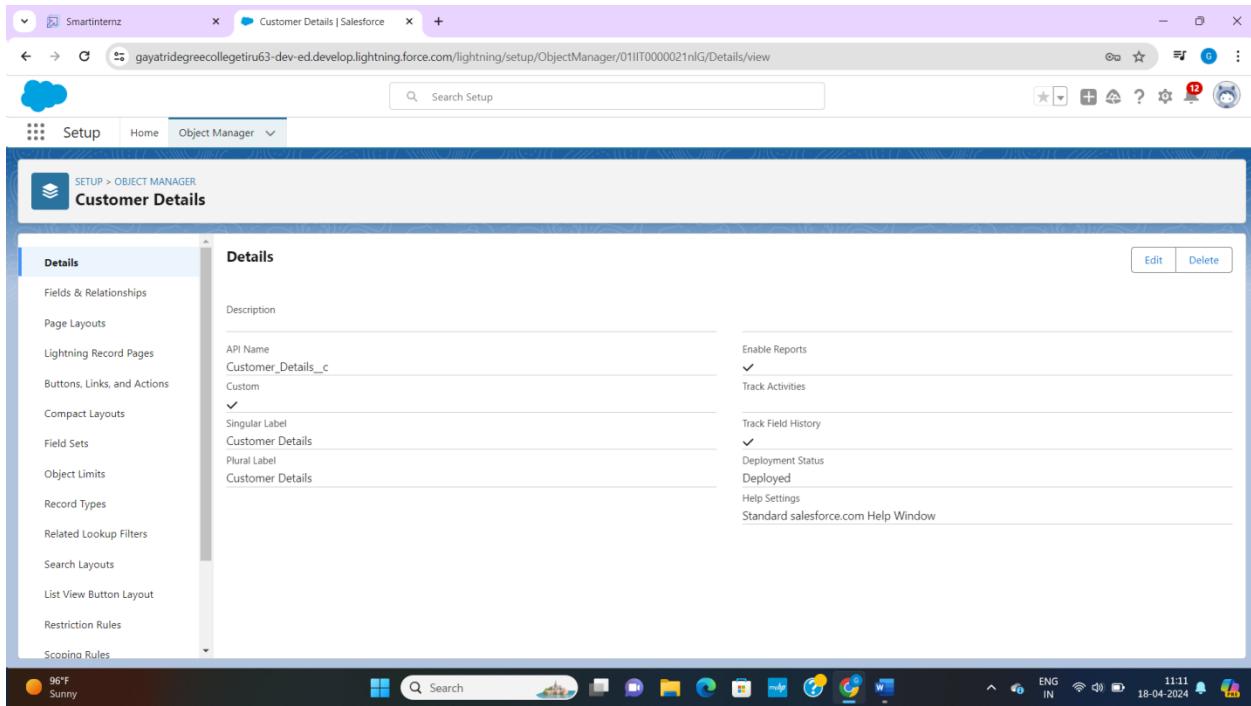

1. Go to salesforce.com and click on login.
2. Enter the username and password that you just created.
3. After login this is the home page which you will see.

Milestone-02: Creation of objects

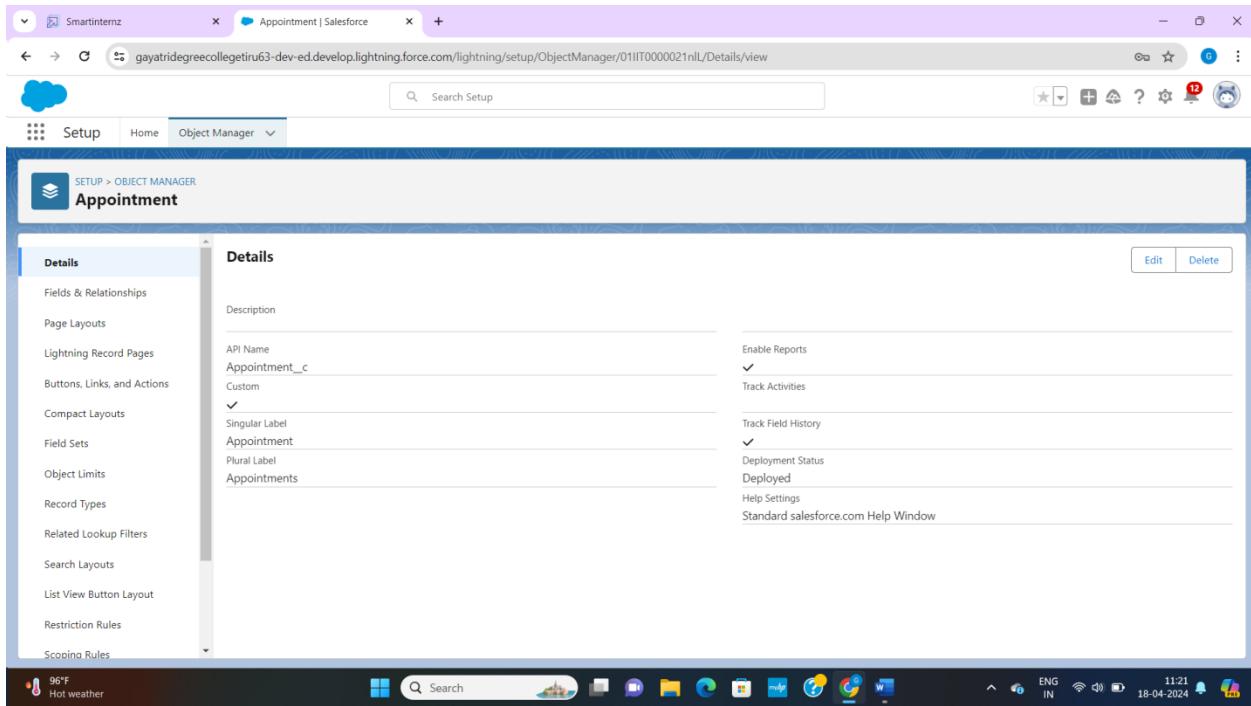

Object – Customer details:

1. From the setup page >> click on object manager>> click on create>>click on custom object.
2. Enter the label name: customer details
3. Plural label name: customer details
4. Enter record name label and format
5. Record name: customer name
6. Date type: text
7. Click on allow reports and track field history.
8. Allow search
9. Click save.

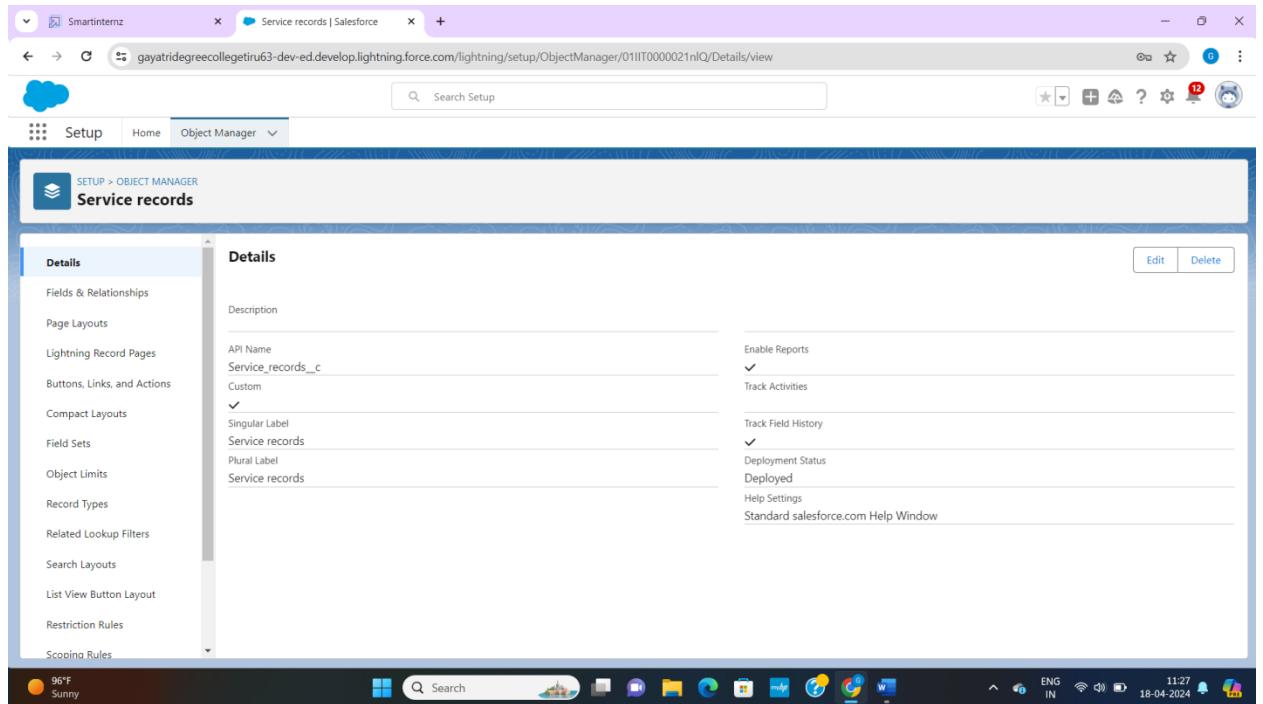

Object – Appointment Object:

1. From the setup page>> click on object manager>> click on create>> click on custom object.
2. Enter the label name: appointment
3. Plural label name: appointments
4. Enter record name label and format
5. Record name: appointment date
6. Data type: auto number
7. Display format: app-{000}
8. Starting number: 1
9. Click on allow reports and track field history,Allow search
- 10.Click save.

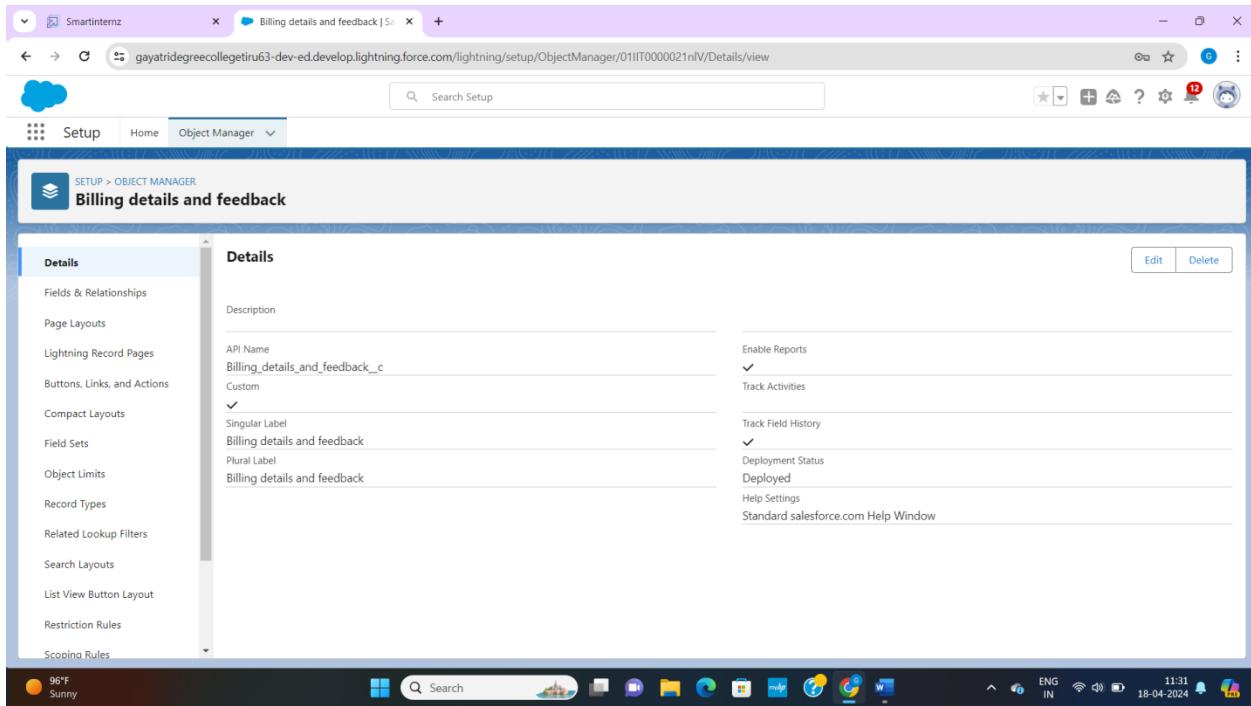

Object - Service Record:

1. From the setup page>> click on object manager>> click on create>> click on custom object.
2. Enter the label name: service records
3. Plural label name: service records
4. Enter record name label and format
5. Record name: service records name
6. Data type: auto number
7. Display format: ser-{000}
8. Starting number: 1
9. Click on allow reports and track field history,Allow search
- 10.Click save

Object – Billing Details And Feedback

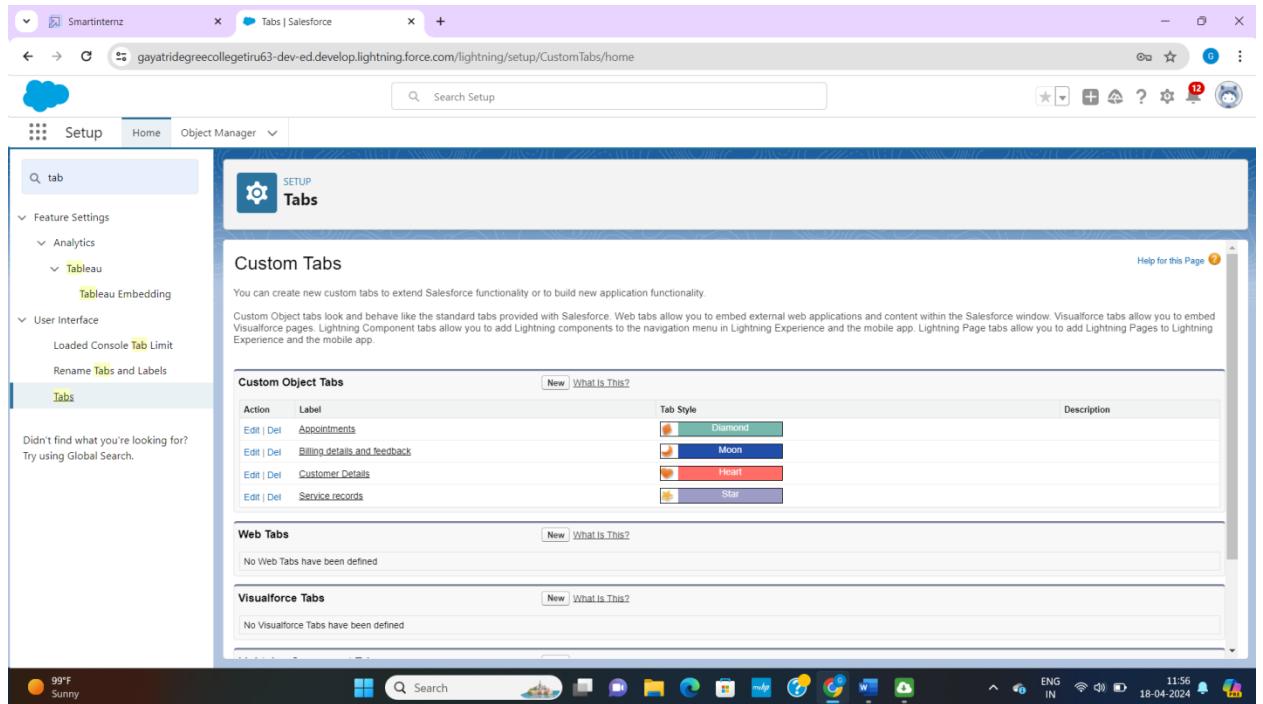

1. From the setup page>> click on object manager>> click on create>> click on custom object.
2. Enter the label name: billing details and feedback
3. Plural label name: billing details and feedback
4. Enter record name label and format
5. Record name: billing details and feedback name
6. Data type: auto number
7. Display format: bill-{000}
8. Starting number: 1
9. Click on allow reports and track field history.
10. Allow search
11. Click save.

Milestone – 03: Tabs

Tabs in salesforce help users view the information at a glance. It displays the data of objects and other web content in the application. Now create a custom tab. Click the home tab.

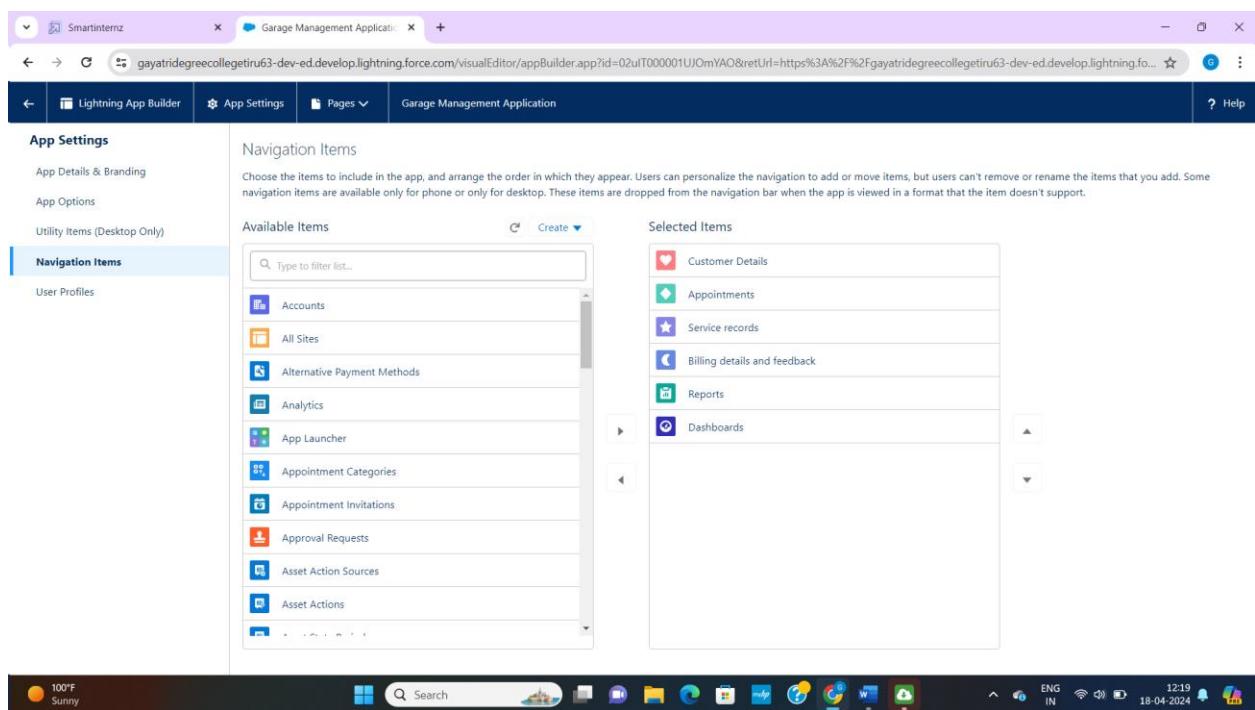

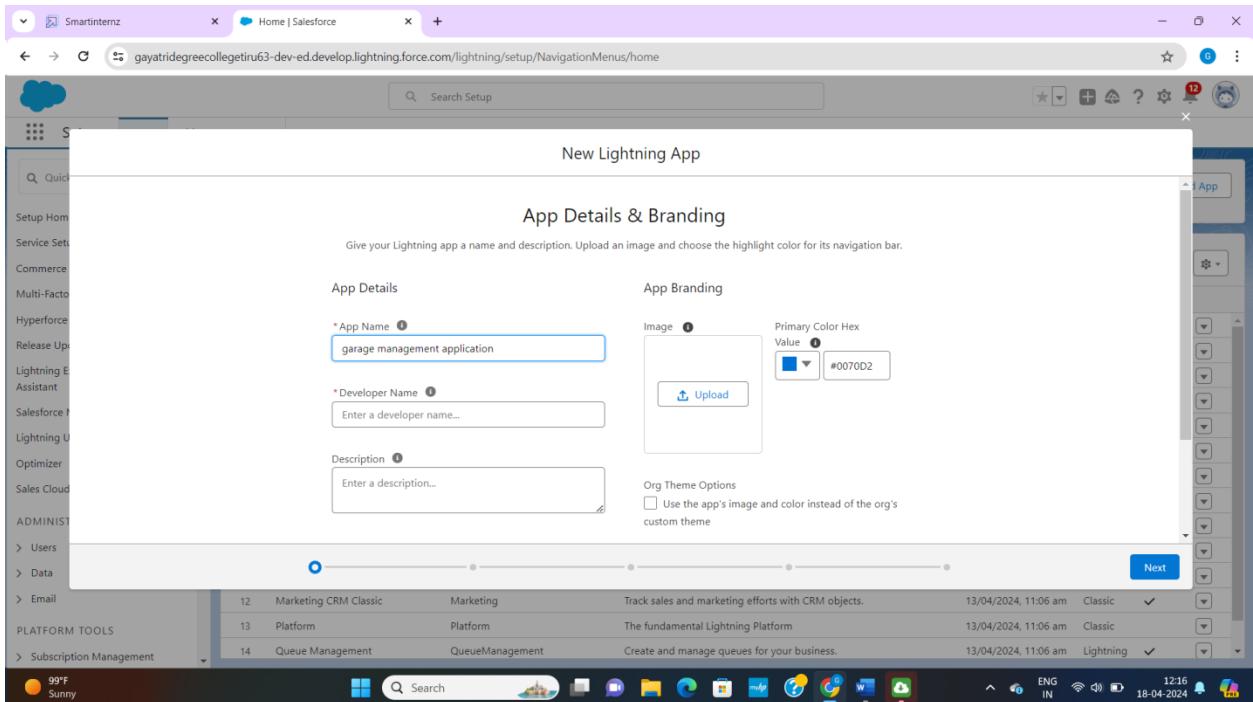

1. Go to setup page>> type tabs in quick fine bar>> click on tabs>> new(under custom object tab)
2. Select object (customer details)
3. Select the tab style
4. Next add to profiles page keep it as default
5. Next add to custom app uncheck the include tab.
6. Make sure that the append tab to users existing personal customizations is checked and save
7. In the same way create tabs for all custom objects – appointments, service records, billing detail and feedback

Milestone – 04 Lightning app

Create the garage management application

1. Go to setup page>> search “app manager” in quick fine >> select “app manager”>> click on new lightning app.
2. Fill the app name in app details as garage management application. Next
3. App option page keep it as default click next
4. Utility items keep it as default click next
5. To app navigation items.
6. Select the items (customer details, appointments, service records, billing details and feedback, reports and dash boards) from the search bar and move it using the arrow button. Click next
7. To add user profiles.
8. Search profile system administrator in the search bar.
9. Click on arrow button and Click save and finish.

Milestone – 05 Fields And Relationship

Creation of fields for the customer details object

1. Go to setup>> click on object manager>> type object name(customer details) in search bar>> click on the object

2. Now click on “fields and relationship”, new
3. Select data type as a “phone”
4. Click next.
5. Field label: phone number
6. Field name: get auto generated
7. Click next, next, save and new

Note : follow the above steps for the remaining fields for the same object.

The screenshots illustrate the Salesforce Object Manager interface. The top screenshot shows the main Object Manager page with a table of objects. The bottom screenshot shows the Fields & Relationships page for the Customer object, with various fields listed and highlighted with red boxes and arrows.

Object Manager Screenshot:

LABEL	API NAME	TYPE	DESCRIPTION	LAST MODIFIED	DEPLOYED

To create another field in an object:

1. Go to setup>> click on object manager>> type object name(customer details) in search bar>> click on object
2. Now click on “fields and relationships”, new
3. Select data type as a “e mail” and click on next
4. Field label: gmail
5. Field name: get auto generated
6. Click on next, next, save and new.

The screenshot shows the Salesforce Setup interface. In the top navigation bar, there are tabs for 'Smartinternz' and 'Customer Details | Salesforce'. Below the tabs, the URL is 'gayatridegreecollegeit63-dev-ed.lightning.force.com/lightning/setup/ObjectManager/01IIT0000021nLG/FieldsAndRelationships/view'. The main content area is titled 'Customer Details' under 'SETUP > OBJECT MANAGER'. On the left, a sidebar lists various setup categories. The 'Fields & Relationships' section is currently selected. It displays a table with columns: FIELD LABEL, FIELD NAME, DATA TYPE, CONTROLLING FIELD, and INDEXED. The table contains six rows corresponding to the fields listed in the screenshot.

Creation of lookup fields on appointment object:

1. Go to setup>> click on object manager>> type object name(appointment) in search bar>> click on the object
2. Now click on “fields and relationships”, new
3. Select “lookup relationship” as data type and click next
4. Select the related object “customer details” and click next
5. Next, next, save

Note: make sure you complete activity 4 before continuing.

The screenshot shows the Salesforce Setup interface. The top navigation bar includes 'Smartinternz', 'Customer Details | Salesforce', and a search bar with 'app'. The main content area is titled 'Object Manager' under 'SETUP > OBJECT MANAGER'. A table lists objects: Appointment (selected and highlighted with a red box), Appointment Category, Appointment Invitation, and Appointment Invitee. At the bottom of the page, the 'Fields & Relationships' section is visible, which was also shown in the previous screenshot.

The screenshot shows the Salesforce Setup interface. The top navigation bar includes 'Smartinternz', 'Customer Details | Salesforce', and a search bar with 'app'. The main content area is titled 'Appointment' under 'SETUP > OBJECT MANAGER'. The 'Fields & Relationships' tab is selected and highlighted with a red box. The 'New' button in the top right of the table header is also highlighted with a red box. The table lists fields: Appointment Date and Appointment Name.

Specify the type of information that the custom field will contain.

Data Type	
<input type="radio"/> None Selected	Select one of the data types below.
<input type="radio"/> Auto Number	A system-generated sequence number that uses a display format you define. The number is automatically incremented for each new record.
<input type="radio"/> Formula	A read-only field that derives its value from a formula expression you define. The formula field is updated when any of the source fields change.
<input type="radio"/> Roll-Up Summary <small>(1)</small>	A read-only field that displays the sum, minimum, or maximum value of a field in a related list or the record count of all records listed in a related list.
<input checked="" type="radio"/> Lookup Relationship	Creates a relationship that links this object to another object. The relationship field allows users to click on a lookup icon to select a value from a popup list. The other object is the source of the values in the list.
<input type="radio"/> Master-Detail Relationship	Creates a special type of parent-child relationship between this object (the child, or "detail") and another object (the parent, or "master") where: <ul style="list-style-type: none"> The relationship field is required on all detail records. The ownership and sharing of a detail record are determined by the master record.

Milestone – 06 validation rules:

To create a validation rule to an appointment object:

1. Go to setup page>> click on object manager>> from drop down click edit for appointment object.
2. Click on validation rules, click new
3. Enter rule name as vehicle

4. Insert the error condition formula as

5. :

NOT(REGEX(Vehicle_number_plate_c , "[A-Z]{2}[0-9]{2}[A-Z]{2}[0-9]{4}"))

6. Enter the error message as “please enter valid number”, select the error location as field and select the field as “vehicle number plate”, and click save.

The screenshot shows the Salesforce Object Manager interface for the 'Appointment' object. On the left, a sidebar lists various setup options like Buttons, Links, and Actions, Field Sets, and Validation Rules. The 'Validation Rules' option is highlighted with a green box. In the main area, a table titled 'Validation Rules' displays one existing rule:

RULE NAME	ERROR LOCATION	ERROR MESSAGE	ACTIVE	MODIFIED BY
Vehicle	Vehicle number plate	Please enter valid number	✓	project2, 25/09/2023, 11:56 am

A 'New' button is visible in the top right corner of the validation rules list. Below the list, a modal window titled 'Validation Rule Edit' is open, showing the configuration for the 'Vehicle' rule. The 'Rule Name' is set to 'Vehicle', 'Active' is checked, and the 'Description' is 'vehicle'. In the 'Error Condition Formula' section, the formula `NOT(REGEX(Vehicle_number_plate_c , "[A-Z]{2}[0-9]{2}[A-Z]{2}[0-9]{4}"))` is entered. A dropdown menu for functions is open, showing options like ABS, ACOS, ADDMONTHS, AND, ASCII, ASIN, etc. A 'Check Syntax' button is at the bottom of the formula input area.

Rule Name	Error Location	Error Message	Active	Modified By
Vehicle	Vehicle number plate	Please enter valid number	✓	POOJITHA GANDIKOTA, 14/04/2024, 5:32 pm

To create a validation rules in service records object:

1. Go to setup page>> click on object manager>> from drop down click edit for service records object.
2. Click on validation rules, click new
3. Enter rule name as “service_status_note”
4. Insert the error condition formula as:
NOT(ISPICKVAL(Service_Status__c , “completed”))
5. Enter the error message as “still it is pending”, select the error location as field and select the field as “service status”, and click save

The screenshot shows the Salesforce Setup interface. The top navigation bar includes tabs for Smartinternz, Service records | Salesforce, and a search bar labeled "Search Setup". Below the navigation is a header with a cloud icon, "Setup", "Home", and "Object Manager". The main content area is titled "Service records" under "SETUP > OBJECT MANAGER". On the left, a sidebar lists various setup categories like Details, Fields & Relationships, Page Layouts, etc., with "Restriction Rules" currently selected. The main pane displays a table titled "Validation Rules" with one item listed:

RULE NAME	ERROR LOCATION	ERROR MESSAGE	ACTIVE	MODIFIED BY
service_status_note	Service Status	still it is pending	✓	POOJITHA GANDIKOTA, 14/04/2024, 5:35 pm

The status bar at the bottom shows the URL as https://gayatridegreecollegeit63-dev-ed.lightning.force.com/one/one.app#/setup/ObjectManager/01II0000021nIQ/ValidationRules/view, the date as 18-04-2024, and the time as 15:05.

To create a validation rule to an billing details and feedback object:

1. Go to setup page>> click on object manager>> from drop down click edit for billing details and feedback object.
2. Click on validation rules, click new
3. Enter rule name as “rating_should_be_less_than_s”
4. Insert the error condition formula as:
NOT(REGEX(Rating_for_service_c , “[1-5]{1}”))
5. Enter the error message as “rating should be from 1 to 5”, select the error location as field and select the field as “rating for service”, and click save.

Milestone – 07 duplicate rules

To create a matching rules to an customer details object:

1. Go to quick find box in setup and search for matching rules
2. Click matching rule, click on new
3. Select the object customer detail and click next

4. Rule name: matching customer details

5. Unique name: is auto populated
6. Define the matching criteria as
7. Field matching methods

Gmail	exact
Phone number	exact
8. Click save and after saving click on activate.

The screenshot shows the Salesforce Matching Rules page. The URL is https://gayatridegreecollegeituru63-dev-ed.lightning.force.com/lightning/setup/MatchingRules/page?address=%2F0JDIT00000Dff9n. The page title is "Matching Rules". A matching rule named "Matching customer details" is displayed. The rule details are as follows:

Object	Customer Details
Rule Name	Matching customer details
Unique Name	Matching_customer_details
Description	
Matching Criteria	(Customer Details: Gmail EXACT MatchBlank = FALSE) AND (Customer Details: Phone_number EXACT MatchBlank = FALSE)
Status	Active
Created By	PCQJITHA GANDIKOTA 14/04/2024, 5:45 pm
Modified By	PCQJITHA GANDIKOTA 14/04/2024, 5:45 pm

To create a duplicate rule to an customer details object

1. Go to quick find box in setup and search for duplicate rules.
2. Click on duplicate rule>> click on new rule>> select customer details object

The screenshot shows the Salesforce Duplicate Rules page. The URL is https://gayatridegreecollegeituru63-dev-ed.my.salesforce.com/one/one.app#/alohaRedirect/0IDIT00000Dff9n?sdtp=p1. The page title is "Duplicate Rules". A table lists various duplicate rules:

Rule Name	Description	Matching Rule	Active	Last Modified By	Last Modified Date
Customer Detail duplicate		Matching Customer details	<input type="checkbox"/>	R2	10/10/2023

3. Rule name as: customer detail duplicate

4. Scroll a little in matching rule section
5. Select matching rule: matching customer details
6. Click on save after saving the duplicate rule, click on activate.

The screenshot shows the 'Duplicate Rules' page in the Salesforce Setup. A specific rule named 'Customer Detail duplicate' is selected. The rule details are as follows:

- Rule Name:** Customer Detail duplicate
- Description:** Customer Details
- Object:** Customer Details
- Record-Level Security:** Enforce sharing rules
- Action On Create:** Allow
- Action On Edit:** Allow
- Alert Text:** Use one of these records?
- Active:** ✓
- Matching Rule:** Matching customer details (selected)
- Matching Criteria:** (Customer Details: Gmail EXACT MatchBlank = FALSE) AND (Customer Details: Phone_number EXACT MatchBlank = FALSE)
- Conditions:** POOJITHA GANDIKOTA, 14/04/2024, 5:48 pm
- Created By:** POOJITHA GANDIKOTA
- Modified By:** POOJITHA GANDIKOTA

Milestone – 08 profiles

Manager profiles

To create a new profile:

1. Go to setup>> type profiles in quick find box>> click on profiles>> clone the desired profile(standard user)>> enter profile name(manager)>> save
2. While still on the profile page click edit
3. Select the custom app settings as default for the garage management application.
4. Scroll down to custom object permission and give access permissions for appointments, billing details and feedback, service records and customer details objects.
5. Changing the session times out after should be “8 hours of inactive”.
6. Change the password policies as mentioned
7. User password expire in should be “never expires”

8. Minimum password length should be “8” and click save

The screenshot shows the Salesforce Setup interface under the Profiles section. A modal window titled 'Clone Profile' is open, prompting the user to enter a new profile name. The 'Profile Name' input field is highlighted with a red box. The status bar at the bottom indicates it's 102°F and mostly sunny.

The screenshot shows the Salesforce Profile Manager page. It displays the details for a 'Standard User' profile named 'Salesforce'. The 'Edit' button in the top right of the profile detail section is highlighted with a red box. The status bar at the bottom indicates it's 102°F and mostly sunny.

The screenshot shows the 'Custom Object Permissions' section of the Profile Manager. It lists various objects and their permissions. The 'Edit' button in the top right of this section is highlighted with a red box. The status bar at the bottom indicates it's 102°F and mostly sunny.

The screenshot shows the 'Custom Object Permissions' section of the Profile Manager. It lists various objects and their permissions. The 'Edit' button in the top right of this section is highlighted with a red box. The status bar at the bottom indicates it's 102°F and mostly sunny.

Sales person profile:

1. Go to setup>> type profile in quick find box>> click on profiles>> clone the desired profile(salesforce platform user)>> enter profile name (salesperson)>>save
2. While still on the profile page, then click edit
3. Select the custom app settings as default for the garage management application.
4. Scroll down to custom object permission and give access permission for appointments, billing details and feedback, service records and customer details objects as mentioned in the below diagram
5. Click save

Custom Object Permissions						
	Basic Access			Data Administration		
	Read	Create	Edit	Delete	View All	Modify All
Appointments	<input checked="" type="checkbox"/>	<input type="checkbox"/>	<input type="checkbox"/>	<input type="checkbox"/>	<input type="checkbox"/>	<input type="checkbox"/>
Billing details and feedback	<input checked="" type="checkbox"/>	<input type="checkbox"/>	<input type="checkbox"/>	<input type="checkbox"/>	<input type="checkbox"/>	<input type="checkbox"/>

Laptops	<input type="checkbox"/>	<input type="checkbox"/>	<input type="checkbox"/>	<input type="checkbox"/>	<input type="checkbox"/>	<input type="checkbox"/>
Service records	<input type="checkbox"/>	<input checked="" type="checkbox"/>	<input type="checkbox"/>	<input type="checkbox"/>	<input type="checkbox"/>	<input type="checkbox"/>
SessionData	<input type="checkbox"/>	<input type="checkbox"/>	<input type="checkbox"/>	<input type="checkbox"/>	<input type="checkbox"/>	<input type="checkbox"/>

Milestone – 09 role and role hierarchy

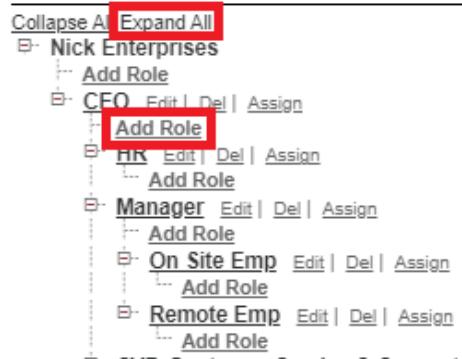

Creating manager role

1. Go to quick find>> search for roles>> click on setup roles.

The screenshot shows the Salesforce Setup Roles page. On the left, there's a sidebar with navigation links like Setup, Home, Object Manager, and a search bar. Under 'Users', the 'Roles' link is highlighted. In the main content area, there's a title 'Understanding Roles' and a sub-section 'Sample Role Hierarchy'. A diagram illustrates a hierarchy from 'Executive Staff' down to 'Sales Reps'. The 'Set Up Roles' button is at the bottom right of the page.

2. Click on expand all and click on add role under whom these role works

Your Organization's Role Hierarchy

3. Give label as “manager” and role name gets auto populated. then click on save

The screenshot shows the 'Role Edit' form. It has three main input fields: 'Label' (containing 'Manger'), 'Role Name' (containing 'Manger'), and 'This role reports to' (containing 'CEO'). Below these fields is a note 'Role Name as displayed on reports'. At the bottom are 'Save' and 'Save & New' buttons.

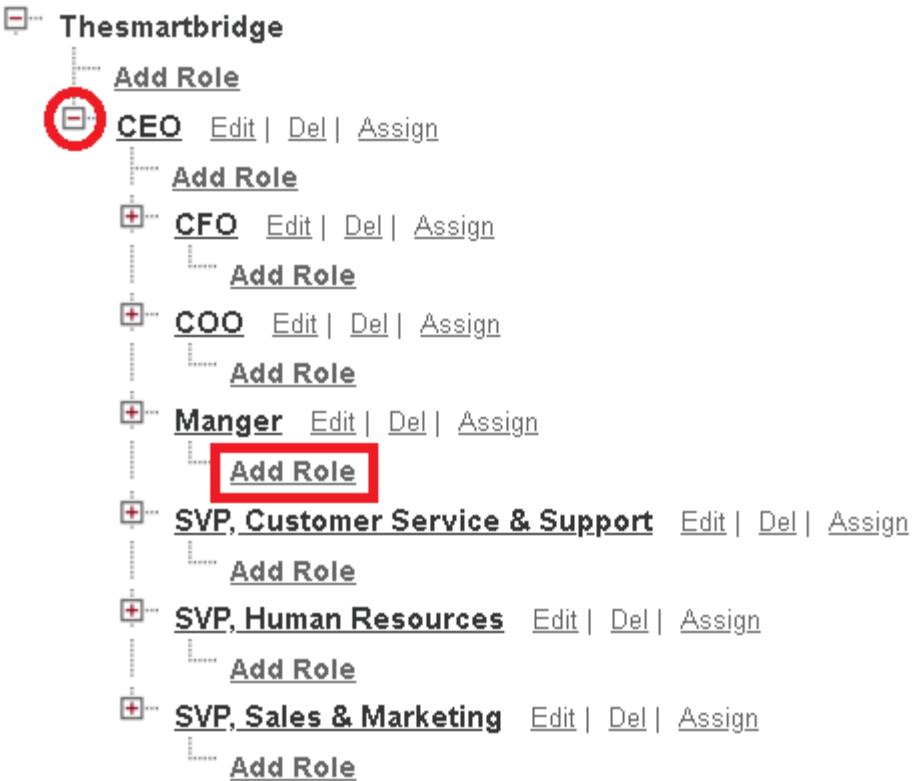

Label	Manger	Role Name	Manger
This role reports to	CEO	Role Name as displayed on reports	
<input type="button" value="Save"/> <input type="button" value="Save & New"/> <input type="button" value="Cancel"/>			

Creating another roles

Creating another two roles under manager

1. Go to quick find>> search for roles>> click on setup roles
2. Click plus on CEO role, and click add role under manager.
3. Give label as “sales person” and role name gets auto populated
4. Then click on save

[Collapse All](#) [Expand All](#)

Milestone – 10 users

Create users

1. Go to setup>> type user in quick find box>> select user>> click new user.
2. Fill in the fields
3. First name: niklaus
4. Last name: mikaelson
5. Alias: give a alias name
6. Email id: give your personal email id
7. User name: user name should be in this form: [text@text.text](#)
8. Nick name: give a nick name
9. Role: manager
10. User licence: salesforce
11. Profile: manager
12. Save

Milestone – 11 public groups

Creating new public groups

1. Go to setup>> type user in quick find box>> select public groups>> click new
2. Give the label as “sales team”
3. Group name is auto populated
4. Search for roles
5. In available members select sales person and click on add it will be moved to selected members
6. Click on save

Action	Label	Group Name	Created By	Created Date
Edit Del	sales team	sales_team	GANDIKOTA POOJITHA	15/04/2024, 2:09 pm

Milestone – 12 sharing settings

Creating sharing settings

1. Go to setup>> type users in quick find box>> select sharing settings>> click edit
2. Change the OWD settings of the service record object to private as shown in figure

Sharing Settings

Work Plan Template	Private	Private	<input checked="" type="checkbox"/>
Work Step Template	Private	Private	<input checked="" type="checkbox"/>
Work Type	Private	Private	<input checked="" type="checkbox"/>
Work Type Group	Public Read/Write	Private	<input checked="" type="checkbox"/>
Appointment	Public Read/Write	Private	<input checked="" type="checkbox"/>
Billing details and feedback	Public Read/Write	Private	<input checked="" type="checkbox"/>

Environment	Public Read/Write	Private	<input checked="" type="checkbox"/>
Laptop	Public Read/Write	Private	<input checked="" type="checkbox"/>
Service records	Private	Private	<input checked="" type="checkbox"/>
SessionData	Public Read/Write	Private	<input checked="" type="checkbox"/>

User Visibility Settings

Portal User Visibility Site User Visibility

Other Settings

Standard Report Visibility Manual User Record Sharing Manager Groups

Minimize the number of roles created, which improves performance by cutting down processing loads
 Grant site users access to related record cases Secure guest user access
 Require permission to view record names in lookup fields

Save **Cancel**

3. Click on save and refresh
4. Scroll down a bit, click new on service records sharing rules
5. Give the label name as “sharing setting”
6. Rule name is auto populated
7. In step 3: select which record to be shared, members of “role”>> “sales person”
8. In step 4: share with, select “roles”>> “manager”
9. In step 5: change the access level to “read/write”.
10. Click on save.

Sharing Settings

You can use sharing rules only to grant wider access to data, not to restrict access.

Step 1: Rule Name

Label: **sharing settings** (arrow)
 Rule Name: **sharing_settings** (arrow)
 Description:

Step 2: Select your rule type

Rule Type: Based on record owner Based on criteria

Step 3: Select which records to be shared

Service records: owned by members of **Roles** (arrow) Sales person (arrow)

Step 4: Select the users to share with

Share with: **Roles** (arrow) Manager (arrow)

Step 5: Select the level of access for the users

Access Level: **Read/Write** (arrow)

Save **Cancel**

Milestone –13 Flows

1. Go to setup>> type flow in quick find box >> click on the flow and select the new flow.
2. Select the record triggered flow and click on create.
3. Select the object as “billing details and feedback” in the dropdown list.
4. select the triggered flow when “a record is created or updated”.
5. Select the optimizes flow for “actions and related records” and click on done.
6. Under the record triggered flow click on “+” symbol and in the drop down list select the “update records element”.
7. Label name: amount update
8. Api name: is auto populated
9. Set a filter condition: “all conditions are met(AND)”
10. Field: payment_status_c
11. Operator: equals
12. Value: completed
13. And set field value for the billing detail and feedback record
14. Field: payment_paid_c
15. Value:
`{!$Record.Service_records__r.Appointment__r.Service_Amount__c}`
16. click done
17. Before creating another element. Create a new resource from toolbox from top left.
18. click on new resources, and select text template.
19. enter the api name: “alert”
20. change the view to plain text
21. In body field paste the syntax in given below

Dear

`{!$Record.Service_records__r.Appointment__r.Customer_Name__c.Name},`

I hope this message finds you well. I wanted to take a moment to express my sincere gratitude for your recent payment for the services provided by our garage management team. Your prompt payment is greatly appreciated, and it helps us continue to provide top-notch services to you and all our valued customers.

Amount paid: {!\$Record.Payment_Paid__c}

Thank you for Coming.

22. click on done.

23. now click on add elements, select action.

24. In action bar in that search the “send email” and click on it.

25. label name as “email alert”

26. API name will autopopulated.

27. Enable the body in set input values for the selected action.

28. select the text template that created body:{!alert}

29. Include the recipient address list as alert

30. Include the subject as “Thank you for your payment – garage management”.

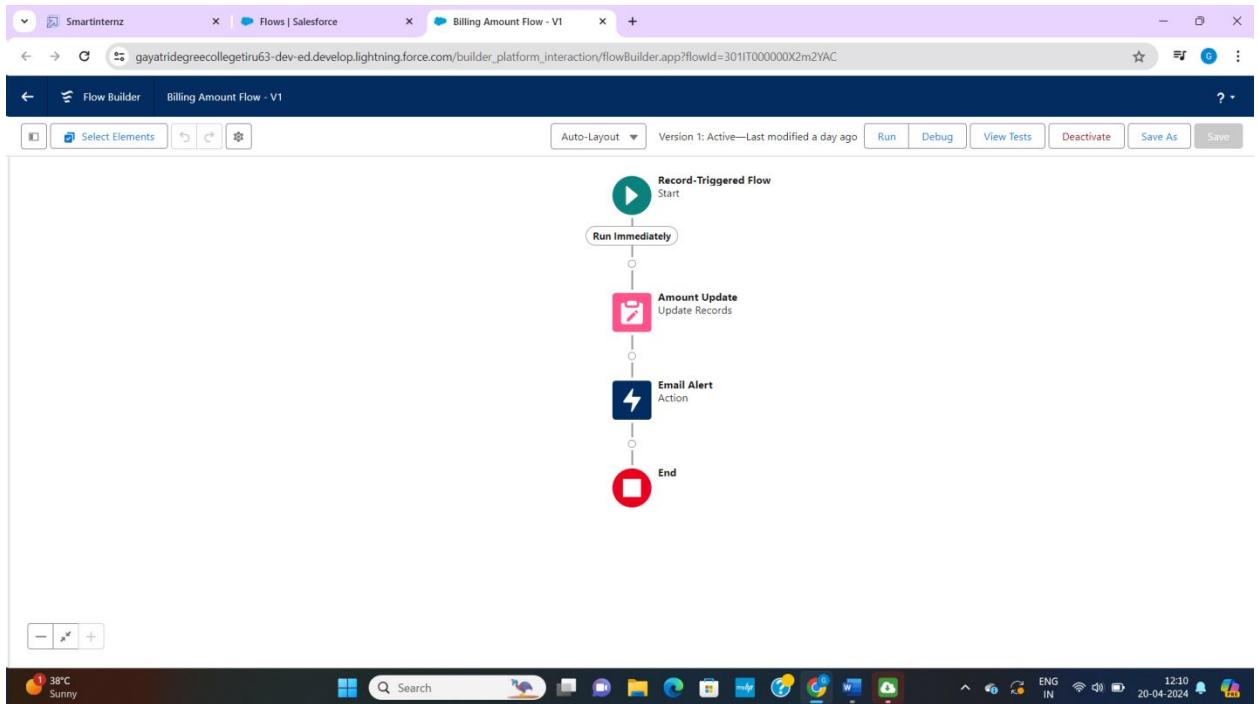

31. click done.

32. click on save. Give the flow label as billing amount flow and api name is auto populated.

33. click save and activate.

The screenshot shows the Salesforce Setup interface with the following details:

- Page Header:** Smartinternz > Flows | Salesforce
- Search Bar:** Search Setup
- Left Sidebar:** Apps (Lightning Bolt, Process Automation, Workflow Actions, Environments), Home, Object Manager.
- Current Page:** Flows
- Section:** Flow Definitions
- Filter:** All Flows
- Table Headers:** Flow Label, Process Type, Act..., Te..., Package State, Pac..., Last Modified By, Last Modified ...
- Table Data:** A list of 38 flow definitions, including:

 - CMS: Notify Content Author (Screen Flow)
 - CMS: Review Content (Screen Flow)
 - CMS: Submit Content for Review (Screen Flow)
 - CMS: Withdraw Review Request (Screen Flow)
 - Create a Case (Screen Flow)
- Buttons:** Flow Trigger Explorer, New Flow

Milestones – 14 Apex Trigger

Apex Handler:

UseCase: this use case work for amount distribution for each service the customer selected the vehicle.

1. Login to the respective trailhead account and navigate to the gear icon in the top right corner.
2. Click on the Developer console. Now you will see a new console window.
3. In the toolbar, you can see FILE. Click on it and navigate to new and create Newapex class.
4. Name the class as “AmountDistributionHandler ”.

The screenshot shows the Salesforce Developer Console interface. The top navigation bar includes tabs for 'Flows | Salesforce' and 'Developer Console'. The main area displays the code for the 'AmountDistributionHandler' class:

```
1 * public class AmountDistributionHandler {  
2  
3     public static void amountDist(list<Appointment__c> listApp){  
4         list<Service_records__c> serList = new list <Service_records__c>();  
5  
6         for(Appointment__c app : listApp){  
7             if(app.Maintenance_service__c == true && app.Repairs__c == true && app.Replacement_Parts__c == true){  
8                 app.Service_Amount__c = 10000;  
9             }  
10            else if(app.Maintenance_service__c == true && app.Repairs__c == true){  
11                app.Service_Amount__c = 5000;  
12            }  
13            else if(app.Maintenance_service__c == true && app.Replacement_Parts__c == true){  
14                app.Service_Amount__c = 8000;  
15            }  
16        }  
17    }  
18    else if(app.Maintenance_service__c == true && app.Replacement_Parts__c == true){  
19        app.Service_Amount__c = 8000;  
20    }  
21    else if(app.Repairs__c == true && app.Replacement_Parts__c == true){  
22        app.Service_Amount__c = 7000;  
23    }  
24    else if(app.Maintenance_service__c == true){  
25        app.Service_Amount__c = 2000;  
26    }  
27    else if(app.Repairs__c == true){  
28        app.Service_Amount__c = 3000;  
29    }  
30    else if(app.Replacement_Parts__c == true){  
31        app.Service_Amount__c = 5000;  
32    }  
33}  
34}
```

The code implements a method 'amountDist' that takes a list of 'Appointment__c' records and updates their 'Service_Amount__c' field based on specific conditions involving 'Maintenance_service__c', 'Repairs__c', and 'Replacement_Parts__c' fields.

This screenshot shows the same Salesforce Developer Console interface, but with additional logic added to the 'amountDist' method:

```
16    }  
17    else if(app.Maintenance_service__c == true && app.Replacement_Parts__c == true){  
18        app.Service_Amount__c = 8000;  
19    }  
20    else if(app.Repairs__c == true && app.Replacement_Parts__c == true){  
21        app.Service_Amount__c = 7000;  
22    }  
23    else if(app.Maintenance_service__c == true){  
24        app.Service_Amount__c = 2000;  
25    }  
26    else if(app.Repairs__c == true){  
27        app.Service_Amount__c = 3000;  
28    }  
29    else if(app.Replacement_Parts__c == true){  
30        app.Service_Amount__c = 5000;  
31    }  
32}  
33}  
34}
```

The new logic handles cases where 'Repairs__c' and 'Replacement_Parts__c' are both true, setting the service amount to 7000. It also handles the case where only 'Replacement_Parts__c' is true, setting the service amount to 5000.

Trigger Handler:
How to create a new trigger:

1. While still in the trailhead account, navigate to the gear icon in the top right corner.
2. Click on developer console and you will be navigated to a new console window.
3. Click on file menu in the tool bar and click on new trigger.
4. Enter the trigger name and the object to be triggered.

5. Name: amountdistution
6. sObject: appointment__c

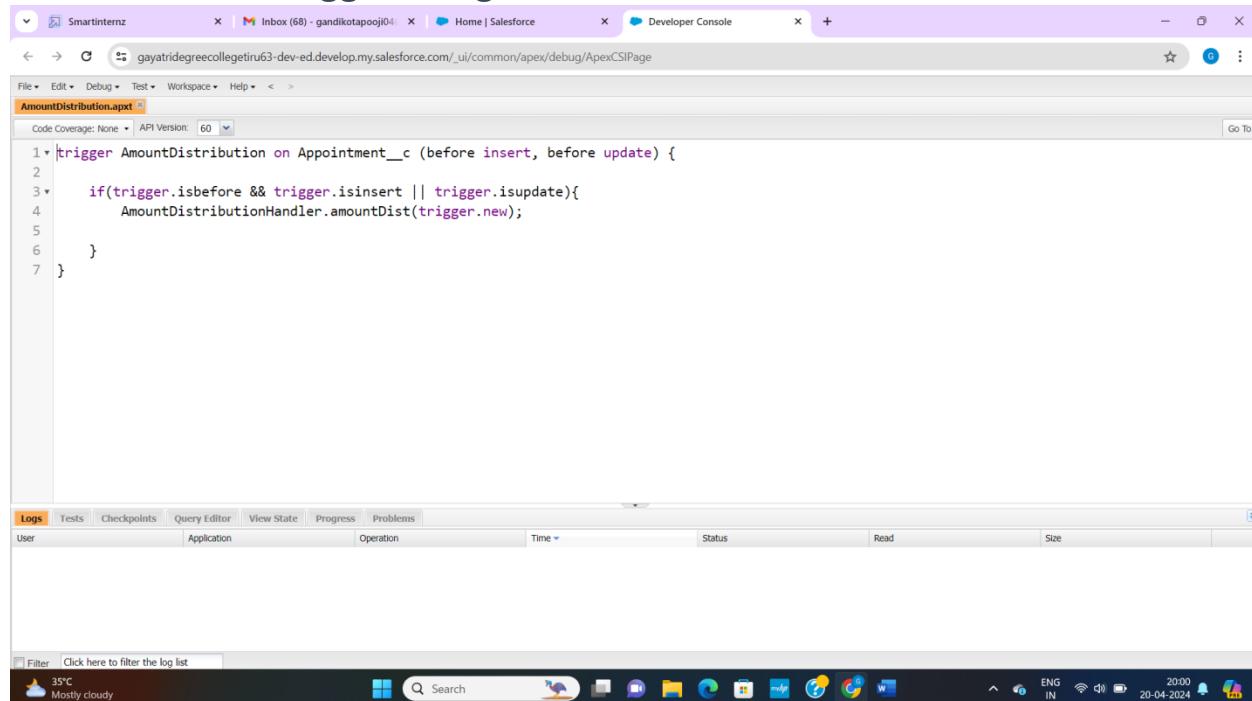

syntax for creating trigger:

The syntax for creating trigger is:

Trigger [trigger name] on [object name] (before/after event)

```
{  
}
```

In this project, trigger is called whenever the particular record sum exceed the threshold i.e, minimum business requirement value. Then the code in the trigger will get executed.

The screenshot shows the Salesforce Developer Console interface. The title bar includes tabs for Smartinternz, Inbox (68), Home | Salesforce, and Developer Console. The main area displays the code for the AmountDistribution trigger:

```
trigger AmountDistribution on Appointment__c (before insert, before update) {
    if(trigger.isbefore && trigger.isinsert || trigger.isupdate){
        AmountDistributionHandler.amountDist(trigger.new);
    }
}
```

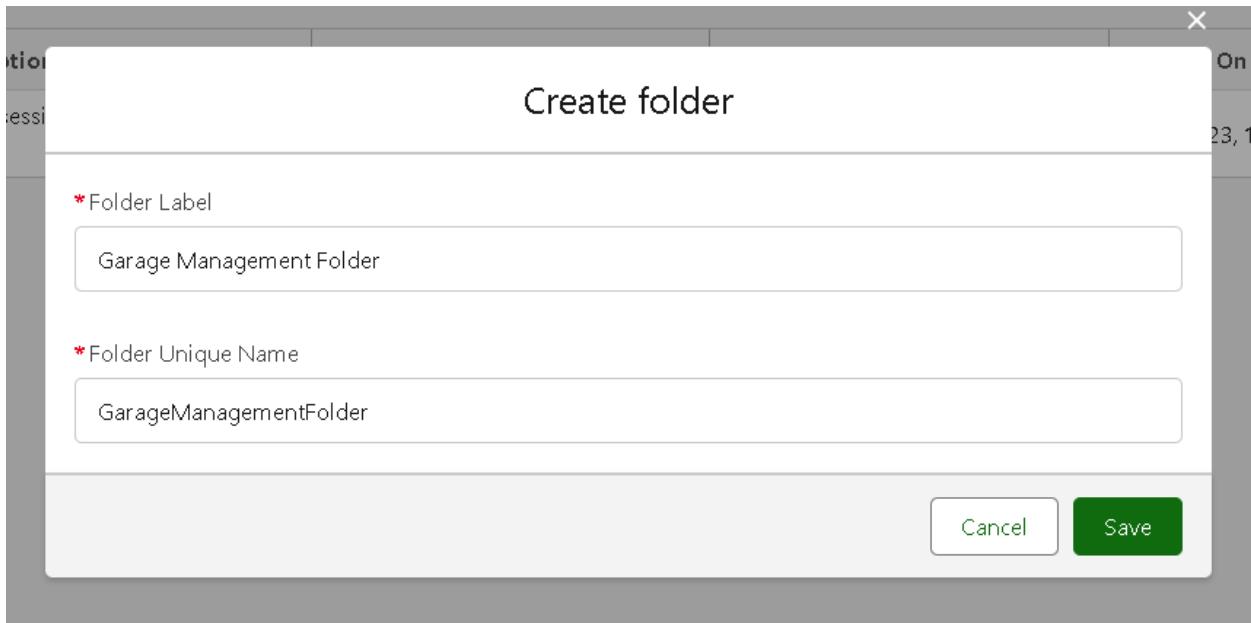

Below the code editor, there are tabs for Logs, Tests, Checkpoints, Query Editor, View State, Progress, and Problems. The Logs tab is selected, showing a table with columns for User, Application, Operation, Time, Status, Read, and Size. A filter bar at the bottom of the logs section allows filtering by log type. The system status bar at the bottom shows weather (35°C, Mostly cloudy), search, and various application icons.

Milestone – 15 Reports:

Create a reports folder:

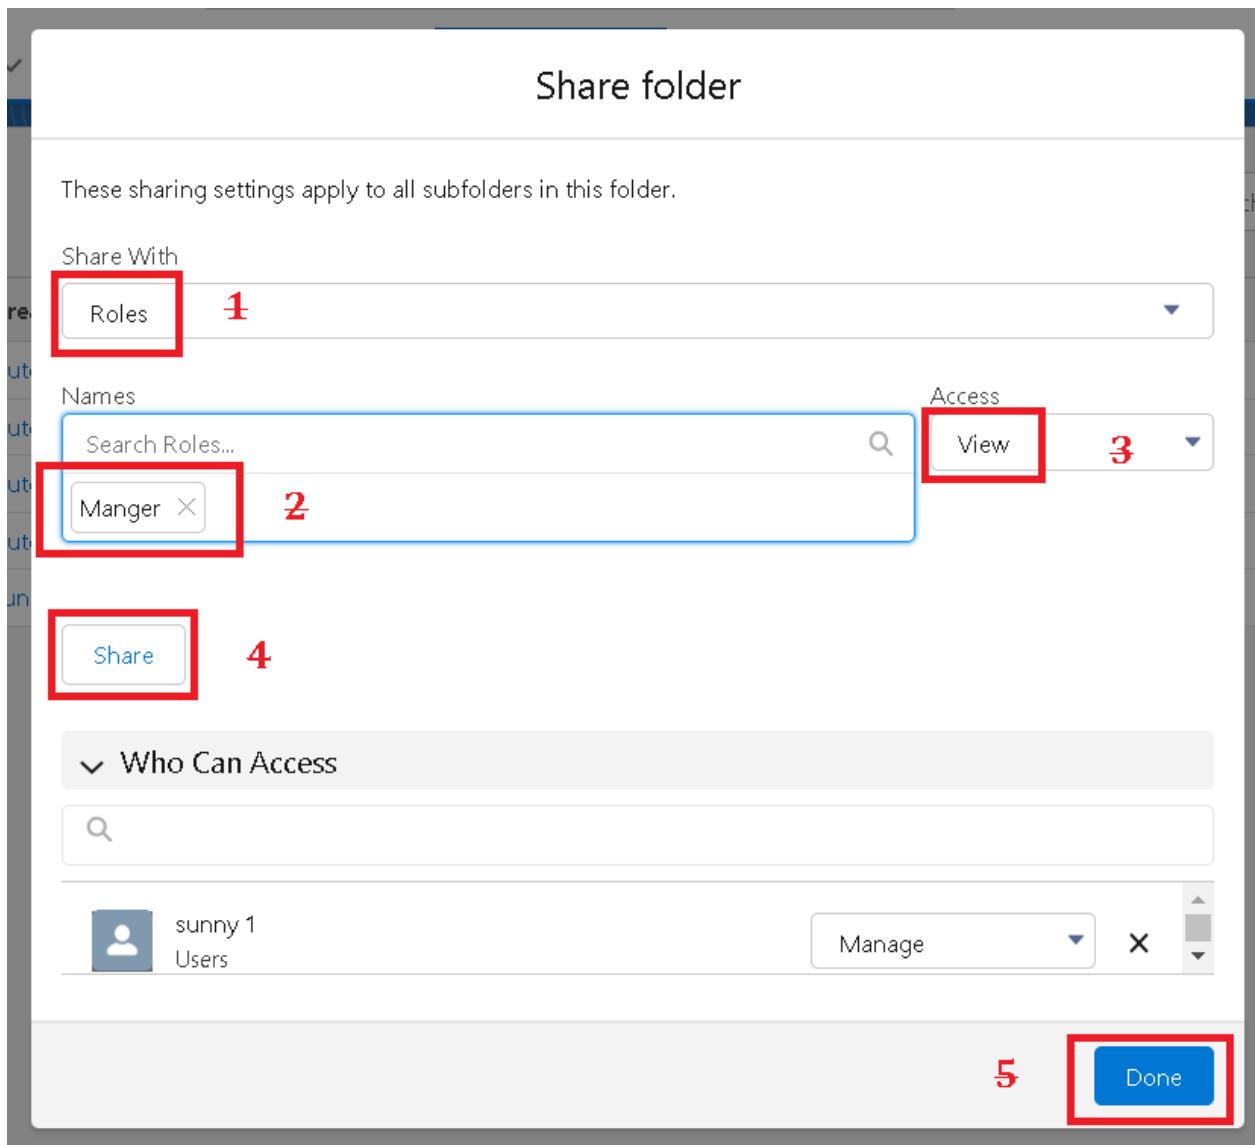

1. click on the app launcher and search for reports

2. click on the report tab, click on new folder
3. Give the folder label name as “garage management folder”. Folder unique name will be auto populated.
4. Click save.

Sharing a report folder:

1. Go to the app >> click on the reports tab.
2. Click on the all folder, click on the drop down arrow for Garage management folder, and click on share.
3. Select the share with as “roles”, in name field search for “manger”, give “view” as access for the role.
4. Then click share and click on done.

Create reports type:

1. Go to setup >> type users in quick find box >>select report type >> click on continue.
2. Click on new custom report type.
3. Select the primary object as “customer detail”
4. Give the report type label as “service information”
5. Report type name is autopopulated.
6. Keep the description as same.
7. Select store in category as “other reports”
8. Select the deployment status as “deployed”, click on next.
9. Now click on related object box

10.Click on select object, choose the appointment object as shown in figure.

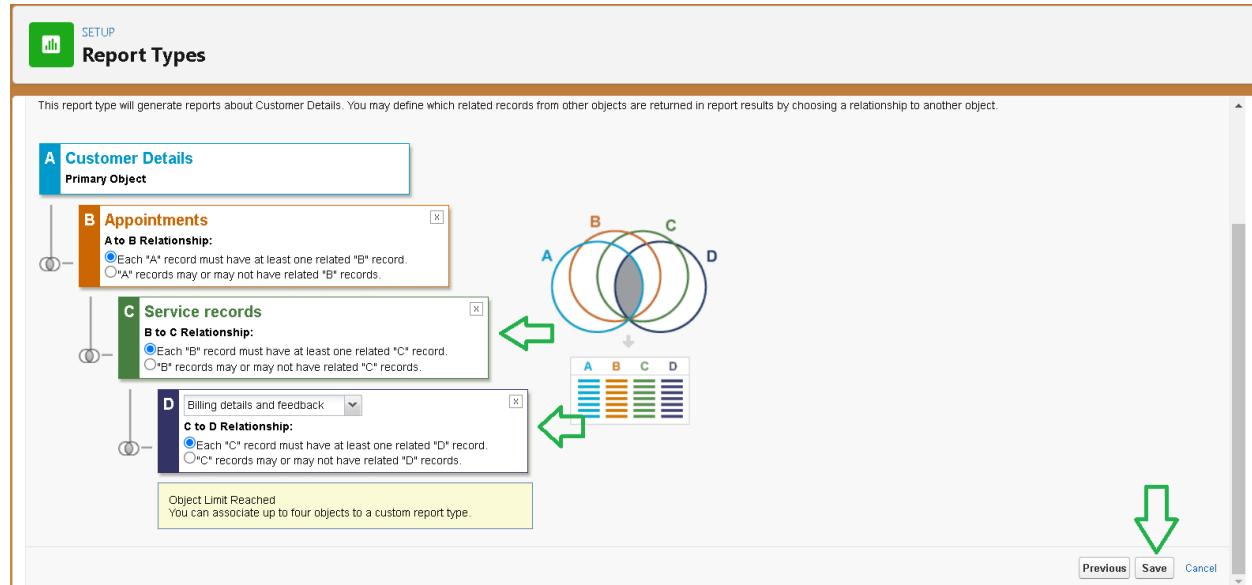

11.again click to relate another object.

12.and select the related object as “service records”.

13.repeat the process and select the related object as “billing details and feedback”.

14.and click on save.

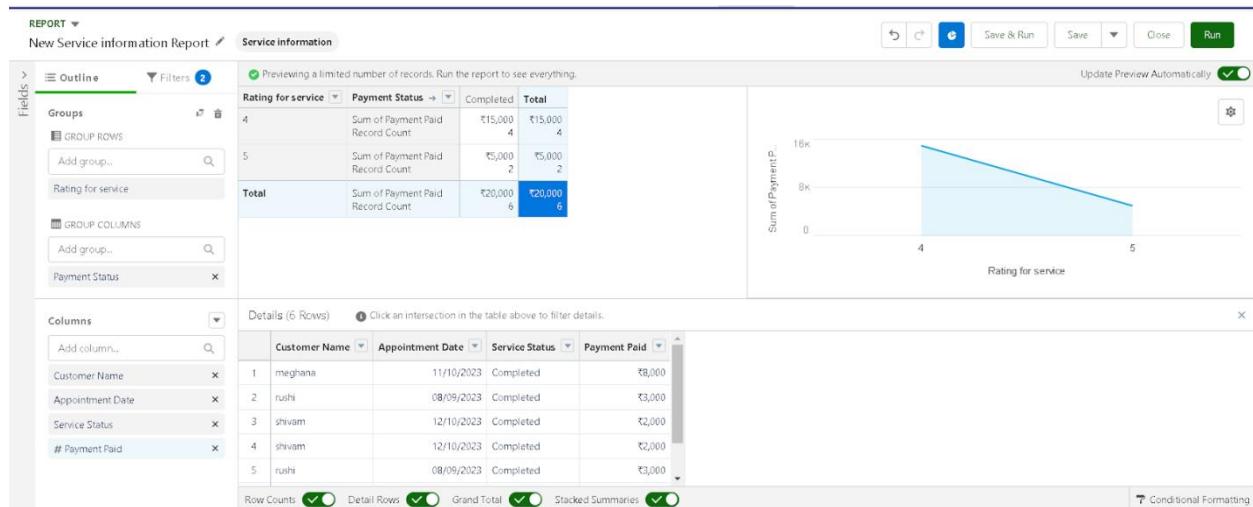

Create report:

Note: before creating reports, create latest “10” records in every object. Try to fill every field in each record for better experience.

1. Go to app >> click on the reports tab.
2. Click on new report.

3. Select the category as other reports, search for the service information, select that report, click on it. And click on start report.
4. Their outline pane is opened already, select the field that mentioned below in column section.
 - a. Customer name
 - b. Appointment date
 - c. Service status
 - d. Payment paid
5. Remove the unnecessary fields.
6. Select the fields that mentioned below in GROUPS ROWS section.
 - a. Rating for service
7. Select the field that mentioned below in GROUP ROWS section.
 - a. Payment status
8. Click on chart, select the line chart.
9. Click on save, give report name: New service information report
10. Report unique name is auto populated
11. Select the folder the created and click on save.

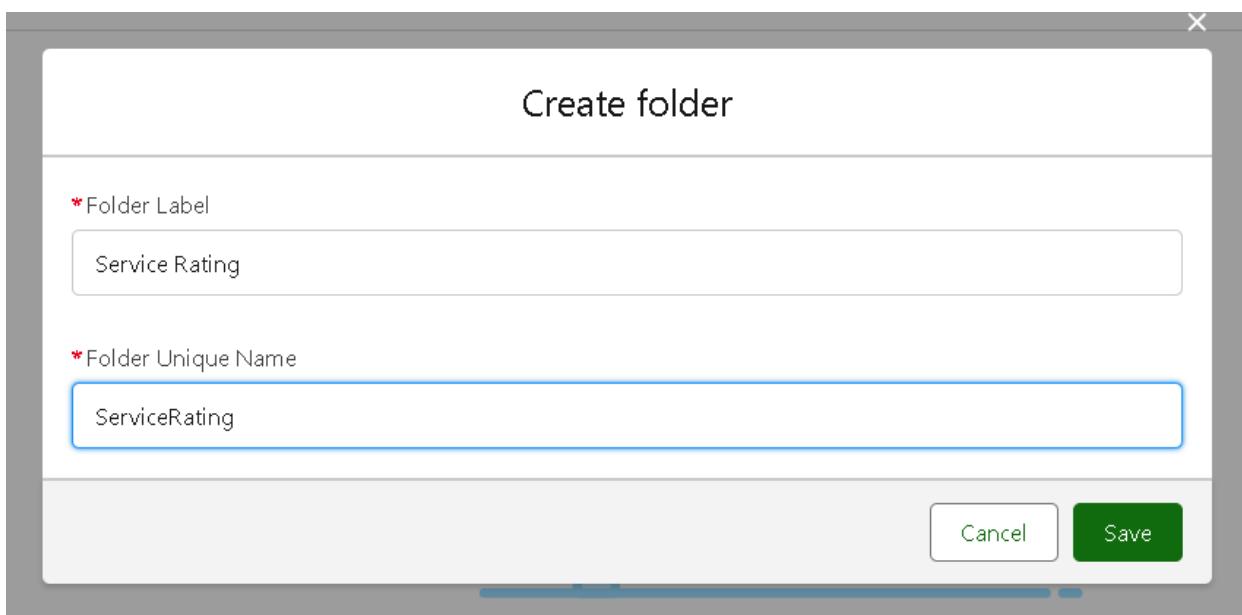

Milestone – 16 Dashboards:

Create dashboards folder:

1. Click on app launcher and search for dashboard.
2. Click on dashboard tab

3. Click new folder, give the folder label as “service rating dashboard”.
4. Folder unique name is auto populated
5. Click save
6. Follow the same steps from milestone 15, and activity 2 and provide the sharing setting for the folder that just created.

Create dashboard:

1. Go to the app launcher >> click on dashboard tabs.
2. Give the name as customer review select the folder that created “service rating” and click on create.
3. Select add component.
4. Select a report and click on select.
5. Select the line chart. Change the theme.
6. Click add and click on save and then click on done.
7. After that click on subscribe on top right
8. Set the frequency as “weekly”.
9. Set a day as Monday and click on save.
